- Bifocal lenses are designed for presbyopic correction.
- They provide the correction for near and far vision. They are characterized by easy adaption to, so the adaptation period is not needed.
- Light photosensitive lenses comfortable for wearing regardless of frame type.
- They react quickly to changes in lighting conditions and give 100% eye protection in indoor (office) and outdoor surroundings.
- When inactive, with HMC layer, they are more transparent than organic lens 1.50 without HMC.
- Tinting and ERP layer applying are not recommended.

ORGANIC BIFOCAL Ø70

Lenses meet the requirements of standards ISO 14889:2003; ISO 9890-1:2004; ISO 9890-2:2004; ISO 9890-3:2003; ISO 9890-4:2000. The production is in compliance with the requirements of the production of medical I class device pursuant to Directive of European Union 93/42 CEE.
